Can we submit by email, or does it need to be by certified mail?

Yes. Please submit this to us. Thank you for your efforts and patience. Since the School will remove the caulk, no further approvals are required from EPA until a substrate remediation plan is submitted. I will be glad to work with you on development of the plan. We would approve the substrate plan under 40 CFR 761.61 c. Please call if you have any questions.

Jim,

Please see the attached and let me know what you think.
